PROJECTS

- AI Automatic Block Planning - Indian Railways**
Smart India Hackathon project delivering a control-room dashboard prototype for automated train block scheduling and traffic optimization.
Technologies: AI/ML • React • TypeScript • Firebase • Automation
- Customer Churn & Revenue Forecasting**
Supervised machine-learning pipeline built to predict customer churn risk and analyze factors driving revenue loss.
Technologies: Python • Scikit-learn • Pandas • XGBoost • Supervised Learning
- ResumeCraft AI - Smart Resume Generator**
AI-powered web application helping students and professionals generate structured, ATS-friendly resumes with intelligent content suggestions.
Technologies: React • TypeScript • Generative AI • Python • Firebase
- Punjabi Shiksha Setu - Educational Portal**
Interactive language-learning web portal featuring structured lesson modules, student progress tracking and interactive quizzes.
Technologies: React • TypeScript • EdTech • Responsive UI • Interactive Web

SKILLS

Technical: Python • SQL • Machine Learning • Scikit-learn • Pandas • XGBoost • React • TypeScript • Git/GitHub • Firebase • Microsoft Office
Professional: Team Collaboration • Problem Solving • Project Coordination • Volunteer Engagement • Adaptability • Community Outreach • Communication • Analytical Thinking

ACTIVITIES & HONORS

- Smart India Hackathon 2025 - GITAM University, Bangalore
- Hackathon 2026 - GITAM University, Bangalore
- Certificate of Completion - Aenexz Tech Private Limited
